PET ENVIRO RANGE

Our innovation has yielded something that we can all feel good about: Earth-friendly products. These products were developed to make it easier for you to make environmentally sound choices.

We are the first in the industry to be able to offer such a range, and rest assured, you will get the same promobagsonline.com quality you've grown trust.

So next time you think green, think Promobagsonline.com

Promobagsonline.com introduces their environmentally friendly bag initiative...

Consumer's worldwide use and discard millions of plastic soft drink containers every day. These can now be recycled and turned into a durable and reusable bag.

Plastic beverage bottles are made with top quality PET (polyethylene terephthalate) resins resulting in the recycled product being superior to lower grades of polyester fibres used in the normal construction of bags. PET bottles are sorted, ground into fine chips, and then cleaned. These chips are then melted and extruded into fibre and woven to create the fabric used in the manufacturing of the bags.

The Promobagsonline.com "PET" range of bags contains azo colorants at levels less than 30ppm and cadmium levels less than 100ppm as per the European Union Directive. They are competitively priced and 'don't cost the Earth'.

4101 PET Tote
